Historical significance (include explanation of themes checked above)

In 1907 the State Legislature appropriated 1200.for electric lights to be placed along the driveway and foot paths around the State Hospital. These were installed the same year. An electric light plant had been in operation since 1894, illuminating the halls and rooms of the hospital complex.

There are four, cast-iron, "bishop's crook" lamp posts still remaining on the property. Three are on the eastern edge of the raod in the rear of the Main Complex. The one in the front has a small plaque on it: "Geo. Cutter, South Bend Ind." These four lampposts probably date fi .m 1907

There are also five examples of a simpler lampp st which have an upright globe atop a fluted, metal column and flaring base. These are all located along the front drive between the main gate and the large parking lot.

10. Bibliography and/or references such as local histories. deeds, assessor's records. early maps, etc.

Annual Reports: 1891-1895, 1907
