all loonly differninated, must eventually prove the mere effation of a wild imagination, or a factious spirit. But the falutary consequences that must flow from thus enabling the government to perceive and iupport the credit of the union, will affard another answer to the objec-tions upon this ground. The State of Pennlyunion, will afford another aniwer to ane objections upon this ground. The State of Pennlylvania particularly, which has encumbered itleff with the afformation of a great proportion of the public debt, will derive confiderable relief and advantage; for as it was the imbecility of the present confiderable relief and the desired public debt, will derive confiderable relief and the present confiderable relief and the following the desired proportion of the present confiderable relief and the desired proportion of the majoration of the present confiderable relief to the funding law, that law must naturally expire, when a competent and enement federal system shall be substituted—the state will then be discharged from an extraordinary butthen, and the national creditor will find it to be his interest to return to his original fecurity.

After all, my fellow citizens, it is neither ex-

traordinary nor unexpected, that the conflitution traordinary nor unexpected, that the confliction offered to your conflictation, thould meet with opposition. It is the nature of man to pursue his own interest, in preferrence to the public good, and I do not mean to make any personal reflection, when I add, that it is the interest of a very numerous, powerful, and respectable body to counteract and destroy the excellent work produred by the late convention. All the officers of government, and all the appointments for the administration of justice and the collection of the public revenue, which are transferred from the individual to the aggregate fovereignty of the individual to the aggregate fovereignty of the States, will neceffairly turn the fiream of influence and englument into a new channel. Every necessary of the movere-killed, and twenty fix made priton-typerfon therefore, who either enjoys or expects of the fire movered to both. I will consess indeed, that I am not a blind admirer of this plan of government, and that there are some parts of it, which if my will had prevail-ed, would certainly have been altered. But, when I resect how widely men differ in their this plan of government, and that there are forme parts of in, which if my will had prevailed, would certainly have been altered.
