The ways which people rake to get riches are vanous. Set they are not always adapted in the
the best manner for obtaining their purposes. The
best and most certain method to obtain wealth is to
adhere to the daties of our respective callings in life,
with shift firstbest and honesty. But no un pursuit of
siches, we Broost remember, that they are, as they
respect our happinest, of small consequence. It may
indeed be argualate riches constitute almost the whole
happinest of atamy people, and that they would be
misstable, if they were deprived of them. But this
could be accounted to the same that they would be
misstable, if they were deprived of them. But this
could be accounted to the same that they would be happinets of actory people, amounts they would be mitterable, it steps were deprived of them. But this kind of happinets may, with a great deal of propriety, be called brush's 1 and when compared with rational happinets, fished wino a gradation, as much becauth it, as the bettial is becent the rational nature. The delights of fenfe las depoted to these of the mind, at the works of main are to the Almighty. That man must therefore be entirely lod, to that enabling characteristic of his nature; which distinguishes than from, and raifes him above, the bruse creation, whost happinets scatte in tending betauter. When we view a min of this character, does not piety arise in our minst 100 we real my inclination which would prompt us tomake as exchange with fach are on? Do we not rather look apon him with contemp? And do wo not fature from the means the merchanty, fordid with, us tomake an exchange with tuch as one? Do we not rather look apon him with contempt? And do we not further frata our breafts the mercenary, fordid with, which unheed tally heals in upon us, in idea of an exchange, even from beiggardly; penury, to this golden doughill of happinels? A competency of this world's good is decisable, and arational purfuit of it, landable: He who has more than this, has thereby, an unaccellar by addition to his world'y cares; and confiquently more induces acrais to forget, and lefs inclination to retenees, the great parant of all golde. He will by degrees throw offall dependence upon the great benefactor, and be infertably led to place it upon the interest of his earthly treafares. And when he has arrived at the formatt of this grandeur, he will be in a fination upon which the poor man, who is contented with his provety look down with pity. That text of feriptore, Mark x 25; "It is enfect for a camel to go through the system the needle than for a rich man as enter the kingdom of God," is very applicable to took an one. Where, by such man, is analoustedly means, one whose chief to ppinels confidence in fire the confidence of them. Riches are for far from being a lefting, or when of this character, that they cought to be considered as one of the greatest corfe; For what greater cala nity can beful a man, than to have an obsection application to his future happinels, which, will be considered as one of the greatest curfes: For what greates calamity can beind a man, than to have an object in appealition to his fature happines, which, will you strength, by his property, and which, "I have trains the formula of his withes, will be an infaperable har total hopes of Heaven.
