Free PAINES from Just of the RIGHTS of MAN.

WHAT Achimedes faid of the mechanical pow Wers, may be applied to reason and liberty:
"Had we," faid he, "a place to fland upon, we might
raise the world."
The revolution of America, presented in politice

what was only theory in mechanics. So deeply rooted were all the government of the old world, and fo ef-feffually had the tyranny and the antiquity of habit ef-tablished itself over the mind, the no beginning could be made in Afia, Africa or Europe, to reform the po-litical condition of man. Freedom had been housed gound the GLOSE reason was confidered as rebellion; and the flavery of fear had made nien afraid to

Bor fuch is the irresifiable nature of truth, that all is this, and all it wants, is the liberty of appearing. The fun needs no infurpion to diffinguish him from darkness; and no footeer did the American governments diffiply themselves to the world, than desposition felt a thock, and MAN began to contemptate rederfit.

The independence of America, considered merely as a feptration from England, would have been a matter of the literature of t

as a feparation from England, would have been a matter of hat little importance, had it not been a crampanied by a revolution in the principle han a crampanied by a revolution in the principle han gractice of
governments. She made a finad, not for herfelf only,
but for the world; and locked beyond the advantages
herfelf could recure. Even, the Heffian, chough
hired to fight against her, may live to blefs his defeat;
and England, condemning the witconfield of in government, rejoice in its milicarriage.

As revolutions have begun (and as the probability
is always greater against a thing beginning, than of proceeding after it has begun) it in satural to expect that
other revolutions will follow. The amazing and full
enercing expences with which old governments are
couldabled, the numicrous wars they engage in or provoke, the embarrishiefuts they throw in the way of unjerfed (criticarion and commerce, and the opprefilou

iverfal civilization and commerce, and the oppression and numeration they after home, have wearied out the patience and exhausted the property of the world. In fuch a furnation, and with the examples already existing, recolutions are to be looked for. They are befubieds of univerfal convertation, and may

confidered 23 the order of the day, 220.

THE revolutions which formerly took place in the world, had nothing in them that interested the bulk of mankind. They entended only to a change of per-fons and measures, but not of principles, and role or fell among the common profactions of the moment.

Oxe of the great advantages of the American Letto-lation has been, that it led to the difference of the prin-ciples and laid open the imposition of government. Al-tevolations till then had been worked within the atmo-

revolutions till then had been worked within the atmotion. The parties were always of the relation of a nation. The parties were always of the relation courtiers: and what ever was their rage for efformation, they carefully preferred the fraud of their profedionals. In all cales they took circ to reprefent government as a thing made up of myfferies, which only themfelves underflood;—and they hid from the underflanding of the nation, the only thing that was beneficial to know, namely, That government is nothing more than a national affociation acting on the principles of fociaty.**

ety.****

Almost every thing appertaining to the circum-finances of a nation, has been abforded and confounded under the general and myflerious word Government under the general and unflerious word Government. Thought it worlds taking to its account the errors it commits, and the milebiefs it occasious, it fails not to arrogate in itself whatever has the appearance of properity. It robs industry of it honors, by pedanticly making itself the cause of its effects; and purtous from the general character of man, the merits that appertain to him as a focial being.**

Ir could have been no difficult thing in the early and folitary ages of the world while the chief employment of men was that of attending flocks and herds, for a banditt of ruffines to over-ran a country, and lay it under contributions. Their, power both,

herds, for a bandint of ruffines to over-rana country, and lay it under contributions. Their, power being the stabilitied, the chief of the band contrived to lote the name. Robber in that of Monarch; and hence the origin of Monarchy and Kinga.**

Thorr hands of robbers having parcelled out the world, and divided it into dominions, began, as is naturally the cafe, to quarrel with each other. What at first was obtained by violence, was confidered by others as lawful to be raten, and a second plumder furceed of the first. They alternative invaded the dominions ern a lawfel to be size, and a fecond plander fucceded the briff. They alternately invaded the dominion which each had aligned to himfelf; and the brutality with, which they treated each other explains the original character of monately. It was ruffian forturing ruffian. The conqueror confidered the conquered, as not his prifoner but his property. He led him in rinomph rating in chains, and doomed him at pleafure, to flavery or death. A time obliterated the hidnoy of their beginning, their funccifion atfuned new appearance, to cut off the entail of their difference, but their principles and objects remained the fonce. What a first was pleased after a funed the following the following their function of the property and the power originally alupted, they affelded to inherit. From face beginning of governments, what could be expected, but a constitutely fifted into a trade. See "Wax is the plant table fifted into a trade. See "Wax is the plant table of governments, and nations

ion? It has efablished it felf into a trade.

WAR is the phare table of governments, and nanous
the dupes of the game.

All the monarchial governments are military.

Wan
is their trade, plander and revenue their objects. While

is uner trade, planter and revenue their objects. While field governments continue, peacehas not the abfolium focusity of a day. What is the history of all monarchial government, but a difficultial picture of human wretchedocfs, and the accidental repliet of a few years reported to the accidental repliet of a few years reported by the few years reported with war, and tired of human batchery, then few down to not not dead with it were. pole? Wearied with war, and tired of numen out-they fat down to reft, and called it peace. This er they fat down to reft, and called it peace. recy at cown to ret, and called a peace. In a cer-lially is not the condition that heaven intended for into and if this be monarchy, well might monarchy be rekoned among the fine of the Jews. If, from the hong, wretched parts of the old world, we look at those anche are in an advanced finge of

improvement, we shall and the greedy hand of one meat threshing itself into every corner and come a industry, and grassing the spoil of the makes.

Invention is continually exercised, to familiarly invention is continually exercised, to familiarly invention. It was the make the continual of the state of tences for revenue and taxation. It watches proper ast its pray, and permits none to cleape without

gath of last month.

The greated part of the flegg had been estrable, a
speciances indicating a recovery were visible for the
a week after he was wounded. But part of a ruly al
and fome finally focus of iron had penetrated when i
was dangerous and difficult to follow them, the furges
concluded at one time that the whole that was emb

was dangerous and diment to rollow them; in singleconcluded at one tires that the whole that was embed, and that the pains were only in confequence of
the unheald force; bottoon after they had finter disafelves with a perfect recovery, they perceived frames
of a mortification, nor could they remore the emb.

His Majeffy was apprized of his certain difficient
feveral days before it took place; he bure the things
this doom with heroick fortinude and refiguration; it
creationed his mental faculties until the last, and pur
orders about the arrangements of the government, as
other important affixir with as much composite ad
wildom as ever he could have done in his most last
moments; and after fufficient the unit excrucianty
ture for twelve days, he expired.

Thus has fallen, in his 4, thy ear, by the lands of
an affaffin, Gustavus the III, of Helfrin Gatta, kin
of Sweden, who was to have headed armine sgrad in

of Sucades, who was to have headed armics spins at dawning liberty of Frames.

He was a man of great personal accomplishment, of extraordinary talents either for the drawing one the cabinet, or the field: He was possessed of man penetration and doplicity; nor was he less remain rounding and ref.: He made an assuming-volution in the government of his county in order, by which he transferred the power of armooner; as his own hands, and rendered himself ability in the country of the second of the second of the second for the second of the second of the second of the second for the second of the seco

by which he transferred the power of arthorner in his own hands, and rendered himself abilities, the case the edy King in Europe, of plentil abilities, yet while we admit him for them, we make meat that he was a despon-one who thought the piperie, or even lives, of millious, should be facilitied in section of the washing or prelinery of Kings.

About the time that his Majelty's wound were promoted to be mortal, he charge di his mind withing to the Regency, and vefted the whole of the mind. The his brother the Duke of Suderman's the fourth KING also draw young King, who was instantly on his that draw he was the fourth KING also dry, is only southern years old, but he has distorted that in a few years he will distinguish himself me than his father, and we hope to a very dimensi we post.

Asvet no men of high authority in the lingual Alyci no men of high authority in the line found to have any there in the plot-high site promp then—all noble indeed, but noblems a perset flutine—whether they were only put, for and that they will not impecal their man properties, we know, not,

And 14. The Bake of Sudarmania the regent of Sweden, sixhown to be a very enterpairing man, and as aurior, superior to the late King—equal to him in Council, but by no means equal to him in the winning arts. Nothing can now be expected from that largedom against the constitution of France; for the Data will find instructure employment in carbing the

bagoni and fifticient employment in embing the utificates at home.

And dies unbang d for want of propen care."
MIDDLETOWN, Juge 9.
On Tuefday last a fehool house 12 this town was
firmek with lightning; but providentially no ures were
lost, alchoogs the children were in fehool as plead in

loft, although the children were in tendor a statist in a factor the afternoon. The fame day the Meeting Houle, at Wethersfield, Rocky-Hill, was firste with lightning, and confiderably, damaged. Had there been an electrical rod, no doubt the finds would have been conducted fafe from the building. The lightning firste as one end of the totale, rending the covering and wall, in in direction to the ground. Another brack of the finds from the ridge, was directed by two rafters to the cyes, and from themse feetiered upon the largest and other finall timbers. other finall timbers

NORTHAMPTON, TUNE 20.

NORTHAMPION. JUNE 20.

We hear from South Carolina, that the extraordinary fwell of the rivers in that flate, in the month of April, has defured at mmentic quantities of Indian com that were flored at the different landing places, for market.—This, it it faid will occasion a demand for count from the northern States till their next crop comes

The flate of the votes for puremor of Newvork is not yet published. It appears that the fifue of no elec-tion fince the prace has engaged the attention or in-terclied the feelings of the critices of that flate, more
