MORALITY.

Order to be observed in AMBERMENT.

ADDRESSED to YOUTH.

T is necessary to observe in your amasement; that is, allow them no more than a few orders. allow them no more than their proper place; I is, allow them no more than their purperplace induly to keep them within due bounds, mingle them in a temperate forceffion with ferious duties, and the higher business of life. Human life cannot proceed, to advantage, without form measure of relaxation and entertainment. We require relief from care. We are not formed for a perpetual firetch of ferious thought, By too intenfe and continued application, our feeble By no intente and continued application, our feeble powers would foo be worn out. At the farms time from our propentity to eafe and pleafure, amulement proves, among all ranks of men, the most dangerous foe to order. For it tends inceftantly to oldry and enemath—to widen its territories—to thrust intelliging in the property of the p croach—to widen its territories—to turns interf. into the place of more important concerns; and thereby to diffurb and counteract the natural courte of things. One frivolous amotement indulged out of feating, will often carry perplexity and confusion through a long forcession of affairs.

Amulement, therefore, altho, they be of an innocent

kind, require fleady government, to keep them within a true and limited province. But fuch as are of an in-regular and vicious nature, require not to be governed, but he bantified from every orderly fociety. As food as a man feeks his happiness from the game table, the mideight revel, and the other haunts of licenticulness. confusion feizes upon him as its own. There will no longer be order in his family, nor order in his affairs, nor order in his time. The most important concerns of life are abandoned. Even the order of pature is, by erfons, inverted—night is changed into day, & day into night. Charafter, honor, and interest itself, are trampled under foot. You may with certainty prog-nosticate the ruin of these men to be just at hand. Disorder arisen to its height, has nearly accomplished its work. The spots of death are upon them. Let every one who would escape the peffilential contagion, sly with hafte from their company.

"Titelement, March 16.
"CITIZEN MINISTER,
"I I amountse to you with the greatest fatisfaction, that the check at Air la Chapelle, as far as it concerns the honor of the French arms, has been repaired, this day in the most brilliant manner. Yesterday the And-trians attacked, and took Tirelemont, in which we had only 400 men. This great town not being suffertible of any defence, and being before the van guard, posted on the five heights of Camplicht, Marcchal Lamarche defended himself with a courage and fall which faved the French army, by giving the different divisions, time to march to his affilience. A midake in the execution of orders might have carried alarm to Bruffels, and even t Paris, because some bodies, in repairing to their place of defination, fell back which, might have made th evil to be believed much greater than it was,
