MA. BUTLER, Please to republish the following Extracts from the publication of the MASSACHUSETTS AGRICULTURAL SOCIETY...

On the management of the Dairy, particularly with respect to the Making and curing of BUTTER.

When a dairy is established, the operator ought to be fully acquainted with every circumstance respecting the manufacture both of butter and cheese...

From the above facts the following conclusions may be clearly deduced: 1. It is of importance, that the cows should be always milked as near the dairy as possible...

When a dairy is established, the operator ought to be fully acquainted with every circumstance respecting the manufacture both of butter and cheese...

When a dairy is established, the operator ought to be fully acquainted with every circumstance respecting the manufacture both of butter and cheese...

When a dairy is established, the operator ought to be fully acquainted with every circumstance respecting the manufacture both of butter and cheese...

When a dairy is established, the operator ought to be fully acquainted with every circumstance respecting the manufacture both of butter and cheese...

the beginning, and loaves besides, that part of the cream, which alone can give richness and high flavour to his butter.

APHORISM II. If milk be put in a dish, and allowed to stand till it becomes cream, the portion which rises first to the surface is richer in quality and greater in quantity than what rises in a second equal portion of time...

APHORISM III. THICK milk always becomes a smaller proportion of the cream it actually contains to the surface, than milk that is thinner...

APHORISM IV. MILK which is put into a bucket or other proper vessel, and carried in it to any considerable distance, is to be much agitated, and is not so good as that which is not so far carried...

From the above facts the following conclusions may be clearly deduced: 1. It is of importance, that the cows should be always milked as near the dairy as possible...

purchase the very best butter at a price not indifferently the farmer for his trouble, I am satisfied from the experience and attentive observation, that it is in general about the fifth part of the milk...

APHORISM V. A dairy can be managed with profit, unless a place properly adapted for keeping the milk, and for carrying on the different operations of the dairy, be first provided...

From the trials I have made, I have reason to believe that when the best in my country is fully separated on Kerepith's thermometer, the separation of the cream from the milk, which is the most important operation of the dairy, goes forward with the greatest regularity...

When a dairy is established, the operator ought to be fully acquainted with every circumstance respecting the manufacture both of butter and cheese...
