EFFECTUAL CURE for the STONE.

MR. PRINTER,

THROUGH the channel of your paper, I request a publication of the following core for the Stone by dissolutions tion, together with the circumflances of tion, together with the circumflances of its atteflation. The gentleman by whose consent and defire, and upon whose authority the subsequent facts are offered to the public, is a Mr. Richard Major, of the gaspel in the baptis society; a man of integrity and much respected. Being in company with him some sew days ago, I had the following relation from his own mouth: "That having for a number of years been salisted with this pointed disease, he was at length informed that a eafe, he was at length informed that a certain physician, his name unknown, laboaring under the fame complaint, being boaring under the fame compliant, being at Reviley figuings, a negro man there preferred to cure him. This has at first different action use in form and could be obtained, afterwards fant for the negro, who agreed to ferwards fent for the negro, who agreed to cure him for three pounds. He accor-tingly undertook and in a short time ef-fectually endicated the distorder. The raph@cian then gave him his choice of free-dom by purchase, in lieu of the contrast betwirk them, on condition that he would distole the means of the cure; to which the flare agreed.
The receipt is the expressed joice of

horsemint and of red onions; one gill of each to be taken every morning and even-eing until the complaint be remored.

That he, Mr. Major, being urged

to a trial of the above mentioned temedy fubmitted to it, though with some reluc-tance, as he conceived his term of life to be but short at most. Not having it in his power to procure green mint, to as to get the juice, he used instead thereof, a firmer decocion of the dried berb: In other refdecoction of the dried new above pre-petts firstly adhering to the above pre-feription, which had the defired effect. He began the experiment in August, '92, and within one week he had ocular de monfration of diffolution by the flighter touch of a particle that had passed him, which continued to do withou paid or the leaft obfirm Aion until the fluor paid or the least obfurction until the flone
was entirely diffolied, and the cure completely efficuence before the enfoing
foring. That from the time the difforder
began to yield as aforefaid, he daily recontrol health, florenth and daily recovered health, ffrength and fieth, and covered nearth, strength and hein, and was in as good plight as ever, age except-ed, being at the time first above-mentioned, being at the time until above-mention-ed feventy-two years of age, with the ap-pearance to me, corresponding with his own account, and as he further faid, with-out the slightest attack of the disorder from the time he began to use the above means of cure." This, at his request, is common nicated with great pleafure to the public,

disaprobation of war.—Abitracted in point of Homan prodence; for what ever advantage one nation would obtain from another, whether it be part of their trom another, whether of commente with them, free paliage on their rivers &c. &c. it would be much cheaper to purchase fach' advantages with ready money, than to pay advantaged with reasy money, team to be the expect of acquiring it by wat. An Army is a devocing Monfter, and which you have raifed it, you have, in order to dapport it not only the fair charges of pay, elothing, provision, arms and ammunition, with numberliefs other consingent and just charges to answer and latisf, but you have energes to answer and tansit, but you have all the additional knavith charges of the numerous tribe of contractors to defray, with those of every other dealer who fur-nishes the articles wanted for your army, and takes advantage of that want to demany, and takes advantage of that want to demany exorbitant prices. It focus to me that if flatefaren had a little more arithmatic, or were more accommed to calculation, wars would be much lefs frequent. By gentlemen who arrived yesterday from N. Y. in the extra stage, we have from N. Y. in the extra tage, we nave two reports relative to the communications from Mr. Pinckney—The one is, that the British count are defirous of forming a com-mercial treaty with this country—The other that they refuse giving up our Wefthe polls, or making any regulations with us on the frore of commercial affirs, and that they demand of the Prefident an immediate and politive declaration, what hid mediate and punise declaration, was the the U. States intend taking in the prefent war!! The latter report appears to us as meriting a lefs degree of circlic than the former, (the, neither appear to deferve full credence) because C. Britain enjoys all the advantages the can with over us, by the captore and concemnation or every Amer-ican veffel that comes in the way of her men of war and privateers—while we treat he as the most favored narion!
