Others who are not the friends, will condemn it as a publica-sons dereliction of our rights and a de-grating fubunities to inclu. I find no be furprized it it thould be viewed to be be furprized it it should be viewed in both these lights by many of my configurate. The infults we have received are admitted to be fuch as would justify the keenest refentments, and kindle the warmell paffins, but that this question occurs, " is cent to be immediately reforted to, or is the path of negociation to be first tried?" If, from a comprehensive view of the flate of things from a recurrence to the practice of nation and from the expediency and propriety of the meafore, the latter be preferred the necessity of checking the public ladig nation, of moderating the popular referen-ment, becomes obvious, and however an-pleafant a talk it man hit, it is the duty of every real friend and timere well wither of his country to attempt it. It is certainly more pleating to fwim with the fiream than to firegele against it, but when the cuttent leads to apparent ruin it must be refished. War is an evil of such magnitude, that it ought to be avoided by every rational exertion confident with a dorregard to the pab-lic bonor. It is not inconfident with national honor to demand in temperate lan tional honor to demand in temperate lan-guing reductor for the highest infuls; the practice of the most houghty nations has authorized the proceeding; fatisfaction may be intained by it without reforming to arms: But should our expectations be difsprointed, we have fill that lait appeal to apply to and it can be done with greater effect after negociation shall have failed a at this time : The juffice of this appeal will be more apparent to all the world, it will be functioned by the unanimous voice of the country, and we fhall be better pre pared to make it.

Scarce had I writen the foregoing ob-fervations when I had the fatisfaction of knowing that the Prefident of the United States, whose gradeos folicitude for his country's good is only equalled by his pro-found judgment in felecting the mestures most likely to advance it, had stamped a value on them by determining, as far his conflictional authority permitted, to give one more trial to negociation. The pa-triotic feetiments which inspired him are difplayed in the following meffage to the Senate; "The communications which I have made to you during your prefent leftion, from the difparches of our ministerin Landon, cuotain a feriens afpect of our at-fairs with Greet Britain. But as peace ceght to be purfued with unremitted zeal before the last resource, which has so orien been the feourge of namons, and cannot fail to check the adjanced professiry of the United States, is contemplated. There thought proper to nominate John Jay, as Envey Extraordinary of the United States to his Betannic M. jefty. My confidence in our Minister Pleasactentiary in London continues and minished. But a million like this, while it correfunds with the for lemnity of the occasion, will announce to the world a folicitude for a friendly adinflorest of our complaints and a relociance to helility. Going immediately from the United States, fach an Envoy, will carry withhim a full knowledge of the exilling temperand feelbility of our country, and will thus betaught to vindicate our rights with firmness, and to cultivate peace with

fine trity."

The Senate Living by a great majority and concurred in this partie difrofition and fanctioned the appointment, it now be-comes the date of every good citizen to furbear from all offs which may fruftrate the negociation (flunds it fail to procure redress, it will then be the duty of every good curzen, to hazard his life and for tune in avenging his country's wrongs.
