Mr. France.

Mr. Fanno.

A fettled course of manness long established in a country, so as to become in the best company, a test of decency and good breeding, is a great-fecunity for good conduct in Society. A stranger in travelling through the United States, if he is their friend, will feel some occasion to country that they have left of this dear. regret that they have less of this advan tage to fecure their good conduct than most other countries in the same state of civilization. They are yet in their revolutionary flate on that fubject. Every repurable firanger of a good fhare of wealth and additionary flate of the state of the sta dreis, introduces a little revolution in the manner of the fociety where he established himfelf. They who are not fond of be-ing often in a revolutionary flate, would do well to enquire in the fifth inflance, whether he is a man of a family ; if he is not, there may be some reason to fear, thar, like fome politicians, he is for intro-ducing the revolutionary flate, to get rid ducing the revolutionary flate, to get rid of fome eftablished order, which oppoles the isodolgence of his own liceationsfars. This enquiry will be more interesting to those who have families, in whose protective they feel their pride and their happiness of conversation always accompanies, and very commonly introduces liceationsfars of conduct. Let a child, particularly let a daughter he brought up in a small fociety, where much liceationses of conversation is indeliged, and her mind will not loop have very flrong fermind the loop have the loop h mind will not long have very firong fen timents of virtue or modelly: What a wife what a mother must she be, who has ve ry feeble, or no featiments of virtue or modely! This reflection is frequently im-portant to ladies and their freinds;— there is no danger of their carrying it to there is no danger of their carrying it to an extreme, it is impossible. An affecta-tion of virue and modelly, where it does not exist, may be disguiling, the reality ne-ter is disguiling. They who cultivate them to the most refined perfection, find every flep of the preserts, attended with increasing respect and success. A lady never diffegards them for a moment, even in her most instance forcets, without real injury to herself. They are the ornament of all her other good qualities, and are the

of all her other good qualities, and are the diamond of her embellishmens: good fense, wit, heasty, good humor, without these lose half their lotte. Any person who is impressed with the justice of these observations, and whose pride leads them to suppose that they have pride leads them to suppose that they have any influence at all over others, would do well at once, to ethablish it as a maxim for themselves, that they will always pay ref-ped to the subject of these observations, in their own families, and in the societies which they most trequent, and that they will, as far as possible, frawn out of countenance, all intruders who dare attempt to different them; this is the only way of le-giflating on the manners of fociety. SOPHRONIA.

NEW YORK February 6. At a large and respectable meeting of the Tanany Seciety or Columbian Order, beld in Tammanical Hall, on Monday

Evening the 1d February, 1795.
WHEREAS in confequence of a Refo-lation of the Tammary Society, psffed at their meeting on the 19-h. Jan. laft, there has been published a Political Address to the Citizens of the United States figued by the Grand Sachem and counterfigued

by the Secretary.

And whereas this Society acknowledges neither political principles for its effab fuir, but is founded on the broad bafis of natural rights, and is folely deligned to diffoloble bonds of Patriotic Friendship.

And whereas, if it be not firifily against And whereis it is no notating against the Tammanial Confliction, it at leak militates against the spirit and tenor of that Confliction for this society to intermeddle in political queftions either by their-actions, or the publication of their fentiments as a fociety, and tends directly to defeat its object, by interrupting Har

mony, and defiroying Friendfhip.

And whereas, the meeting before mentioned, confidering the importance of its timed, confidening the importance of its look of the most of the m

ing forthe decision of a fail infecting which inght eatily have been called.

And whereas the authors of the address, with to favour them with their commands, among many after exceptionable things decidedly approved of the Denanciation of paid to their property.

They likewife would with to purchase the Prefident of the United States against They likewife would with to purchase the Prefident of the United States against They likewife would with to purchase the property. felf errated ficietier; But also bec
