NATIONAL CONVENTION

24 Fraitial June 12.

Seveler, in the name of the Committee of General Safety, proposed to substitute for the name of Revolutionary Committee, every where becomes adjour, the name of Committee of Inspection. He niged the neceffity of this chance, on the recollection the engrange excelles committed by the faid revolutionary authorities. "But it is not words alone, but things which mult undergo a change, if we wish to replace the foul infroments of demagogy, by a magistracy friendly to liberty. Neverthelefe the Convention is fatisfied, for the prefent, with febüttoting the name of Commitry Committee."

Boarfault complained of the word death, engraved upon the public edifices, as tending to produce melancholy ideas. He propoled to fubilisate the words hunanity and justice.

Le Hardi proposed, that for the bonnet-

rouge on which he thought he fill observ-ed the mais of blood would be subflimted the bonnet-tricolore.

Guoymare objected to these changes,

It is a fact that his engaging dead him. county courts I have not been able to dis-cover a lingle case where the plea of ira be-ing a British debr was relied upon that the qualiton was decided in layour of the plain-

tiff. In fome inflances where foils have been inflitted by a company, many of whose members, and especially those named in the writ were civizens, judgments have been rendered without a control, and withocen rendered without a contell, and with-our alledging it to be a British debt, but if there he one foliury case in which it has been decided, before the period feeders of, by a county court, that British debts were recoverable, the case is unknown to me and her thinked.

recoverable, the cale is unknown to me and has elluded my enquiries.

There are inflances, in which a verdift has been found for the defendant on the mere evidence of a plantin's name when it really was not, nor was alledged to be a British debt. The superior course not being so numerous, the general tenor of their conduct can with more cafe be afcertained. I dutt can with more eafe be afterstrined. I do arer that in he fugle inflance did the fugetion cours of law of this country, determine eld British debts to be preoverable, and that judgment had been readered in the Federal court. The eafe of Nittodel in the Federal court. The eafe of Nittodel in the Federal court. The eafe of Nittodel in proved circlity the rewrife of that for which it is circle. To that addion the defendant elected is her that the superior circle. it is circl. To that action the defendant pleaded in but that it was a Bhilli debt, and therefore by ri-laws of this country not recoverable. The plaintiff did not demar to the plas and thereby admit the fact, but deny the validity of the bar. The record will flow that he took liftee on the plas alledged. The quedion to be tried was, not whether a British debt was recoverable, but whether that was a British debt. The verified of the intra was not a British debt. The verdict of the jury was, not a British creditor could recover, but that the plain-tisf was not a British creditor. It is worthy of remaik, that sitho' the question was a question of fact only, the judge at first refused to permit it to be tried, nor would be, until it became obvious that the plea

or, until it became obvious that the plea would be used as a fixen plea in every case, allow a jury to be fourn in the canse. The reason be gover as I am told, was, that the verdist might possibly by being for the defendant, render it necessary for him to decide the nucliton of I am concerning the wasterline of the western than the materials of the state. him to decide the quelition of law impecua-ing the materiality of the diffee, which was a queltion not to be decided apan smill there. Should be a conclusion of all the judges at a meeting of the general court. The cafe of Mitchel then proves, that in our flast courts, a British craftior, at that time. could not have recovered his debt. But it is supported that he the decision of the Federal Court in 1993, all impediments were transper.

The fact is not fa.

When it was determined that Britifn when it was determined that arthun debts were recoverable it was also determined, and I think rightly; that, in cases of payment into the treasury, the original debtura were entitely-difebarged. Yet in definit were entirely offeranged. Let us never was conceived that the right of the original creditor was extinguished. It is a trath not to be denied, that while the acts of our legislatures on this subject difcharge the debtor, the treaty of 1783 flip-charge the debtor, the treaty of 1783 flip-ulates for his recovery of that right. When the court determined that the o-riginal debtor was dicharged, that the principles of their decision feemed to be, that the commonwealth of Virginia, hav-ing power to do fo, had forbitined itself responsible for the debt. But the flate had, in 1787 paffed an aft declaring that was opened, as were commenced by Britifth ereditors. The right to recover debts
contracted bre the was was fo feriously
contracted bre the was was for feriously
contracted breather the this surject, is known to op-teen, that; whatever decision may be made by the courts, they will not pey the debt, and an attempt to coerce the payment would linke our government to its foundation.

So far then as the amount of the pay-
