

LONDON, August 1.

In the 27th July, while the Convention was celebrating the anniversary of Robespierre's downfall, Tallien, returned from Quiberon, entered the Hall, and gave an account of the doings of the Emigrants, which in all the material points agrees with the accounts from Sir J. B. Warren's squadron. The only terms offered to those who endeavoured to defend themselves, according to Tallien, were to throw down their arms and surrender at discretion. The prisoners, instead of being conducted into the interior, are to be tried by a Military Commission upon the coast. Before such a tribunal, it is easy to foresee what will be the fate of the Nobles and Priests. — Perhaps the lives of the rest may be spared.

Another account of Tallien's speech says, that the Bishop of Dijon and his clergy are among the persons taken; and that the attack upon Fort Pontchartrain and the entrenched camp of the Emigrants was made by 3000 men from the army of the North. These were probably sent over for the service on account of their superior skill and discipline. Great praises are bestowed on the talents and conduct of General Hoche, since the first news of the invasion appears to have acted with equal promptitude and judgment. The quantity of arms, stores, and provisions taken is perhaps exaggerated, although certainly very considerable.

PITTSBURGH, Sept. 19.

The following is communicated by the British despatch arrived here from Presque Isle.

"They belonged to the Indians, and were employed as a escort between Detroit and Fort Erie; that on the 28th of August last, at night, the said Indians, by taking a boat left in charge of one of them with five two pounds on board, but the lake running very rough, they were obliged to throw out of them overboard; that they kept close into the shore until they arrived at Presque Isle; as they paddled Sandusky, they saw a great many Indians, but did not go inshore for fear of being apprehended and sent back; that there was great talk at Detroit of the surrender of the posts at the time stipulated in the treaty, but that the inhabitants, particularly the mercantile part, were much against it. — One of the men says he was in the fort commanded by Major Campbell, at the Miami, at the time General Wayne defeated the Indians, and that they left in that action, the greater part of their chiefs, and had the pursuit continued a little longer, they would have been driven into the river, where many of them must have perished."

Belchertown, Sept. 22, 1795.

Commonwealth of Massachusetts.

To the Honorable Senate and House of Representatives, in General Assembly assembled, this 5th day of Octo-

ber, 1795.

THE Memorialists beg leave to represent to your Honour, that the main post road between Boston and Springfield, is some part of it very bad, especially in the winter, when they will give 5 per bushel, and give Salt in exchange—they also desire to purchase, 3000 weight of Cheeze, if delivered soon, we would think our friends who have engaged us Cheeze, to deliver it by the 20th instant, if they can make it convenient.

They beg leave further to represent, that in Connecticut and Rhode-Island, great exertions have been made to amend the roads in those parts, especially between Norwich and Providence, with an intent to turn the western travel that way.—Your memorialists taking this subject into consideration, conclude that no way can be found effectual to amend the road above mentioned, but the establishment of a company (under such regulations as you know) with power to mend the said road, and with a right to take some reasonable toll for their maintenance.

They conceive it would be a great advantage to the western part of the state, to have their people, who are engaged in the manufacture of iron, to have a market for their produce, and to dispose of it to the public.

For the honour of a commission, and the safety of a military title, beside, as every man, who is now obliged to serve in the militia, ought to be excused, who is unable to provide his own dinner, and fence those, who stand as spectators, would much better stay at home, about their proper business, if not both able and willing to bear their own expenses, what is frequently lafied, in seeking a multitude, would be far better bestowed upon proper objects of charity, or religion, as it would not be so difficult to promote something, as to have a Heretic, and others, for an Aristo-

crat.

The subject in view is a cession, which is obtained in many places, of paying an extravagant price for the horrors of military promotion. Whether these honors are worth paying something, or nothing for, is not the question. It seems, that many are willing to pay dearly for them, rather than not enjoy them.

As I have to do with military titles, execellent little to do with the militia, as it is not likely that any man, who has not been in the service, will be promoted to a rank above that of Captain, or Major, or Lieutenant, &c. &c.
