THE following anecdote of Capt.

During a recent craize off the coaft of France, Capt. Morre fell in with fomefmall fifting veffels, who on his approach, aban-doned the nets, and affected their efeape to flore; heing in want of fresh provisions, he ordered out his boats, and drew the nets, by which means he obtained a con-fiderable quantity of fifth. With due con fideration however, to the wretched pay arels, whom he had thus deprived of the ards, whom he had thus deprived of the bire of their isloun, he afterstined the value of the fifth, which proved, on the tellimony of the pilot to be fix guiceas; and this fum, together with an appropriate letter be pot into an abladder, and fulpended it to the next, which he again three with the water and fet fill. The frighted fill catter from the hare winefed, he are ermen from the thore witnessed the early part of the transaction, and on the departore of the frigate returned to their flatio for the trigate feterated to their flation, for the purpose of faving the remnant of their nets, which, according to ulonge, they expedied to have found hacked to piece. How great must have been their gratitude and cellight, when, on drawing in their cets, they not only differented them whole, but the trackers exclusive them. nt the treafure atrached to them ? This bill was reed a first time; the second Thursday of the next sellon was offigued for its second granding, and 300 copies of it were to be granted for the use, of the members of the General Court. Any possible plan which might be officed, would meet with as strong an op-position perhaps at that which has been made to the Ctreuit Centre of Common Pleas. The attempt to establish this new atrongement has routed from of the melf-cettedies of Giova and dispositions of the homo character; the pulse awaiter the homan character; the pride, avarice, ambitton and influence of many are firmck at. and the blow is felt by a great number, from those in high effice down to the

There are many who fee, that by any reform, they must be losers. There are not a few, fons of Demetrior, who well know that, by the old embatraffments, "no fmall gain is brought onto the Craffmen;" they, therefore, with to saile an uproar and which long habit has familiarized and endeared.
