" Very dear Sun,
" It is with real regret, that we learned the prematere death of your illustrious and unfortunate nephew, with the meian choly circumflances attending it +-We have not crafed to invoke divine provi dence, that he may deign to fortify and encourage your Maj-fly, that you may be enabled in these times of calamity to support the borden of the crown of year an-ceflort.

The mistortunes and advertities that have inceffantly prefied upon you face your departure from France, have been in-timately felt by every one. But to these misfortanes there is an end. Confide then In the infinite mercy of the Almighty : He alone will decide between you and the French people, whether they ought to be re-publicate, or whether they fould be fubjest to a King ? His will, which fall be freely made kerum by the prople in the new national organization, will undoubtedly decide up on that bersic facrifice which is worthy to be made by a faul like yours in factour of the re role of human kind. — The anequivocal prin-ciples of equity which have superceeded the harbarons feftem of terror, under which France has grouned, give us reason to hope that pacific resolutions will be the fulfilment of the defigns of the Almighty.

Alwho, with the best intentions, may be intemperately earned in a good caufe, yet these men are not generally the hest sop-porters of such a cause; at all events it is prodect for us, to be on our goard against those, who endeavour violently to lead the public opinion, who continually committee their opponents, and attribute to them the worst of motives. It cannot be proved, that violence and intemperate pattion were ever ofeful infroments in a well ordered flate of fociety. Even where a governit meat requires to be overturned, and mult be totally changed, unrefrained peffion is too productive of human calamity; but it canest produce a peaceful and ofeful amend ment.
