

FRIENDSHIP, sweet balm of human life,
Extinguisher of every strife
That clouds our mortal state;
To thee with suppliant hand I bend,
O grant my prayer! O give a friend!

Chosen and fit by fate.

Not one whom fond intent rules,

And tool for torment tools.

His affection constant form:

Not him who is disposed conceals

Malice and Envy's bitter meals,

Meth's hellish swan.

Nor him who with pectoral fire,

Can stalk in phlegm's ire.

And prove his proportion;

The important fool who in dispute,

Can Locke and Hume and Paul refute,

With thundering opposition.—

Nor him who with every shape,

And mucus to excombi or an ape.

Now and man of feeling;

Always affects a different hue;

Now red, now green, now black now bluer,

Everly a feeling.

Such may be friends to all mankind,

As long as they their interest find

To make the cheap pretension;

Yet break but once the slender tie,

Friendship, nought but comity.

Buried in oblivion.

To me prefer none open minded,

Mouths and garments uncornd.

To narrow views and bounds;

With clear good sense and honest will,

To take the good or bear the ill.

Of fortune slippery rounds.

Who when life's playful scenes are o'er,

Pleasures and pain shall no more;

When death and pain deprives me;

By my best hand shall early laid

Bear up my nature to the faithful friend

And smiling bid God hies me.

From the Shop of Messrs. COLON & SPONDER.

ATTENTION, HAYMAKERS.

Suspend your scythes—Leave off your pitchforks—

Strike your rods in the soil, and while the reaping

sickle giveth merrily sound, listen to Neptune's

Waves' advice who drinking.

Fellow Labourers.

WHEN we sweat most, we think much,

and drink most abundantly—You will all pro-

mence the most abundant, which you will

find strong and healthy.

They do not drink. Flip—The body in this

Yule season being extremely heated, sets like a

fire, the Rum immediately flies off, and the heavy,

clammy dregs of the Beer and Sugar, remain

to clog the stomach, render the labourer dull

and weak, and often excite inflammatory disease.

Do not drink Toddy or Milk Punch, for the

same reason.

If Rum, Brandy, Whisky, Gin, or other al-

cohol spirits be drunk, take half a pint at a time,

and immediately drink large draughts of water after it. For the same reason, when a

man is crack brained enough to throw a fire-brad

into a magazine of power, he cannot do better,

than to throw water upon the burning coal as

fast as possible.

Drink Switchel—that is, Molasses or Maple Sy-

rup or Marmalade, two thirds wa-

ters, Spruce or Small Beer.

Not boiled—if you would be

healthy, buy Cider and water. This acid in Cider

is well preventative against all putrid disorders.

Brisk Vining-wine for the faint reason.

Drink Purified Water—You have been told

frightful stories about people who have been

cooled, and who have died suddenly by drinking

cold water. Set the nail to the sun, half an hour

before you use it; for reuse, wait another

four times with the cold water, and you may

then drink freely from the cold water again.

If you do you know, it will strengthen

and you will need at the next draw, no other

call to awake you than the chirping of the early

bird—you will arise to the next day's labor like

a giant, refreshed with wine.

Dayon doubt what I say, let the greatest grig

braver come and try a fall at wrestling with me

a tempest water drinker of six years of

age—Or take out an acre of local meadow, and see

who will cut it first.

Fellow laborers when you work for yourselves

you will readily allow that the slate of strong

liquors will be a great favor to your pa-

ssion, you want to keep you gay, and infect your

accounts at the tradesmen's and factors' to my calcu-

lation—Say the hay seafarers, taking the af-

ternoon's calculation, one month; say that

they have three hours to work—allow them each

but a pint of mead daily. This will amount,

by a rough calculation, to 6 gallons, which at

12½ a gallon for West India Rum, would cost 12

Dollars, besides the expense of Sugar. New Eng-

land Rum, it is true, would be something less, but

Brandy something more. Now the sum of 12

dollars in these hard times, would do many val-

uable things for a farmer; I might purchase these

calves, which would trouble in two years. It would

pay the ministerial, and the parson's pa-

rticulars, and his wife when he bleats him with

the rich prelate of a sturdy boy, or healthy girl. It

might effect a valuable sleep in oxen, or perhaps

pay two or three notes or accompts, or such part-

of item as may prevent the Lawyer from making

promises for the "balance," and for "ran" to

two or three bills of exchange each larger than the original debt, and to leave the favorite mare, at the likely rate of 100, from being taken by the lawns and sold for half their value at the post.

But some of you, fellow laborers, drink strong liquors when you work at us do we now, because you say they cost you nothing; and you are ready to call your employer blushing who with so much trouble the slate of profits. You are mistaken my friends, every gill of rum given to you by those who hire you, costs you much.

Sometimes it costs you a quart with your best friends, sometimes a bloody nose, or broken limb, and often a lawsuit, and half of cost, or a fine upon confession, before a judge of the peace for assault and battery; and often a long doctor's bill for a disorder, which you may not, but physician knows arises from this very cause of strong liquor. Sometimes it costs you the respect of your toadies, the regard of your children, and love of your wife, because your reputation in this world is lost, and few will believe in the next.

And so forth many evils, Friends?

The LAY PREACHER.

NEW YORK, July 27.

Office of Inspection.

Our country prospers in all quarters, with abundant crops. The hay is in vast quantities, and of the best quality. The rains of May and June caused a full growth, and the succeeding dry weather enabled the farmer to gather and cure it in the best manner. We find a maid of honor, though she never paid a cent!

The police's, unlike that of men of the mode,

are excellent, and the horses, well-bred, and

well-tempered. The horses are in the best condition.
