9. Historical significance (include explanation of themes checked above)

This is one of a number of bracketed residences built in the area south of Main St. in Florence during the 1860's. Shingling has taken away some of the detailing of the house but the ornate double brackets under the eaves and the detailing of the front porch provide interest. The porch is composed of a flat roof, chamfered posts and elaborate brackets. There is also a one-story bay window on the eastern side of the house.
