9. Historical significance (include explanation of themes checked above)

This large, 2½ story house was built early in the 20th century on a lot in J.W. Hubbard's subdivision. This subdivision was located north of Bridge St. and includes the present day Hubbard Ave. and Marshall, Swan and Crosby Streets. The plan was first filed in 1891, but was amended in 1900. By 1915 7 houses had been constructed, with 5 of them being on Hubbard Ave. Today the subdivision is complete. John W. Hubbard lived on Bridge St. and his homestead included all of the land subsequently subdivided.

The 2½ story, hipped roof block has a front, 2½ story gabled projection as well as a side 2½ story gabled projection. The front projection has cut-aways on the first floor, a cut-away porch with semi-elliptical openings and a Palladian window in the gable. A one-story, flat roof porch connects the projection to the main block of the house. The porches have turned posts and simple balusters, with the first floor porch decorated with brackets.
