9. Historical significance (include explanation of themes checked above)

Dryads Green was laid out in 1890 as part of Hammond and Sullivan's subdivision off of Elm St., which also included Harrison Ave. George Cable, the well-known author, lived at no. 23 Dryads Green and owned most of the lots on the western and southern sides of the street. Mr. Cable sold lots for development or had houses constructed on contract and sold the property later.

This house first appears on the 1915 atlas and was occupied by Mrs. Jennie Heine and Aida Heine, and associate professor of Geology at Smith College.

The house is two stories tall with high hipped slate roof and hipped dormers. The three-bay facade has a central entrance with sidelights, and is covered by a one-story porch with flat roof, projecting cornice and frieze, Tuscan columns and balustrade. The porch is capped by a balcony.
